

Silk Ocean Cast Flying Colours Max Pro is made in Japan from the finest Dyneema UHMWPE raw material.

This is a pure braid with no additives to most of the line other than a 100m distance marking that appears every 20metres on the line. Each marking is a different colour (5colours).

The new FCMP brand is stronger than any other braid that Ocean Devil have made before and with the unique process of colour-changing marking we can offer anglers to measure casting distance as well as the distance of a hookup.

5% thicker yet 20% stronger than Silk Ocean Cast puts this braid up there with the very best available.

Designed by Ocean Devils R+D team to provide the lowest diameter braid while having the highest break strength on the market.

Each batch of line that comes off the braiding machine is individually tested for quality, diameter size and strength to ensure we maintain consistency.

Made in Japan.
